PROFESSIONAL SUMMARY

AI/ML Developer with hands-on experience building Generative AI, RAG, Computer Vision applications using LLMs, LangChain, and TensorFlow. Skilled in Python, FastAPI, and SQL, with practical expertise in model training, backend integration. Strong analytical and problem-solving abilities supported by Data Structures & Algorithms.

TECHNICAL SKILLS

Languages: Python, SQL

Libraries & Frameworks: TensorFlow, scikit-learn, FastAPI, LangChain, OpenCV

Tools & Technologies: Git, GitHub, Docker, Jira

Databases: MySQL

PROJECTS

AI Music Recommendation System:

- Developed a real-time AI system that recommends music by analyzing facial expressions through a webcam.
- Built and trained a Convolutional Neural Network (CNN) using TensorFlow and OpenCV to classify emotions such as happy, sad, and neutral.
- Integrated the emotion detection pipeline to dynamically create and suggest playlists that match the user's current mood.

RehabMate:

- Developed an AI-powered physiotherapy web application that monitors rehabilitation exercises through a webcam, provides real-time posture correction feedback, and stores daily data to track user progress.
- Integrated MediaPipe for body landmark detection and exercise posture classification, with FastAPI backend APIs, PostgreSQL for database management, and HTML/CSS/JavaScript for frontend interface.
- Recorded 76% overall posture classification accuracy during experimental evaluation across 5 rehabilitation exercises.

PDF_Guru:

- Designed and developed a privacy-preserving Retrieval-Augmented Generation (RAG) system that enables users to query PDF content securely in multi-user environments.
- Utilized Groq's Llama 3.3 70B model with ChromaDB to deliver real-time, in-memory document retrieval and analysis while ensuring session isolation and zero file persistence for enterprise-grade confidentiality.

EXPERIENCE

AIML Intern – WEBiSOFTECH

Jan 2026 – Apr 2026

- Performed data preprocessing, EDA, and feature engineering to prepare real-world datasets for modeling.
- Assisted in integrating trained ML models into web applications and validating model outputs.
- Worked on end-to-end AI/ML pipelines, from data collection to model evaluation.

EDUCATION

Sanjay Ghodawat University

Kolhapur Maharashtra

Bachelor of Technology (B. Tech) in Artificial Intelligence & Machine Learning

2022 – 2026

Cumulative GPA: 8.3/10

Activities & Leadership

- NSS Volunteer:
- 2024 – 2026
- Contributed to community service initiatives, including cleanliness drives and public awareness campaigns.
 - Collaborated with a team to organize and execute local community events, enhancing organizational and teamwork skills.
- Cubicles Club:
- 2024 – 2026
- Actively participated in workshops on emerging technologies like Docker and Git & GitHub. Collaborated with peers in coding mini-projects, fostering practical problem-solving skills.
